Thread: [8\\$ PP & BTC C# CRACKER/CHECKER TEMPLATE/SOURCE CODE +Working \[disallowed\] checker included](#)

Malcolm???????????????? - March 31, 2020, 7:12 am

Bumping this yet again, can't believe no one want's to purchase this, will leave it up for a couple more days, then take it down.

PM ME TO PURCHASE, I'M ONLINE ALMOST ALWAYS

This is what you'll recieve, comes with an already working checker for [disallowed] for easier understandment of the code

(Dont mind the title and authentication, it was made by request for someone else, this will be auth excluded)

This comes with no assistance due to pricing, so purchase only if you can read and understand the code as a minimum.

Pretty straight forward, it's a checker template written in C# that i wrote some time back to use for all my checkers.

Includes

Already working [disallowed] checker so it's easier to understand how it works

Stable and easy to understand code

Light-weight

Insane CPM due to simple threading

Got vouches but it's from a different forum which is against the rules, i'll be happy to show you them if you reach out to me ?

Only selling one last copy of this to first come first serve, if interested in full resale rights and ownership please pm me regarding this.

[contract=tid]Start Contract[/contract]
