Thread: [CRYPTO & STOCKS TRADING SCRIPT \[EASY MONEY\]](#)

yaif - March 31, 2020, 6:14 pm

Hello there

My name is yaif but I am also known as Lethal. I have a phd in blockchain and supply chain and in my free time I am a script developer. Anyway, enough of me.

In this Thread I am selling my TradingView script. Just to be clear, this is not a bot it is a script. Now what does it look like?

As I've mentioned in the headline it is applicable for stocks as well.

The script works the best on the hourly, daily and weekly chart.

Now some advice for anyone who is interested in buying it:

Now for everyone that is interested in buying here is some advice:

- ALWAYS follow the trend
- Don't try to counter the trend no matter what (The trend is your friend till the end :P)
- Don't FOMO too hard sometimes it's more profitable to wait for a confirmation candle close (FOMO = Fear of missing out)
- Don't go balls deep on the leverage if you wanna trade with derivatives (5x or 10x is more than enough unless you wanna play it risky)
- Ride the trend till it changes
- Green lines are for buys/ going long
- Red lines are for sells/ going short

TP and SL is up to you

If you are interested add me on discord: Lethal#6168

yaif or lethal, you are not a script developer, you are a big liar
this is not your script, is a well know trading script

big liar

this is not your script, is a well know trading script

what do you mean a "well known" script? this -rep is so pointless, obviously there is other scripts as well, I am just selling my selfmade one since it has been very reliable to me

this is not your script, is a well know trading script

Is that a paid script the one you mention?

Latest IP matching other members: 1

OP should focus more on not getting his ass closed rather than reselling public scripts.
