Thread: [MY ROUTER HAS NO OPEN PORT AND I CANNOT OPEN PORTS](#)

Lebanquier02 - March 31, 2020, 7:58 pm

need help please

Me Huawei router has no open port, I think this is my box !! Can you offer me other means !! It is true that I could not pay to pay for this help but I need you. Be nice to precede them towards a young person who has only the desire to learn in order to be like these idols??

You can use a VPN to Port forward

Or

follow this: <https://hackforums.net/showthread.php?tid=6057838>

use this to help with that

If you're still having issues, send me a convo.

Obistone - March 31, 2020, 11:55 pm

Don't ever use your personal router for RAtIng. Whether you're doing it legally or not.

[nVPN](#) is a cheap, no-logs VPN that allows you to port forward, please consider using it.

Niltsar00 - April 1, 2020, 1:41 am

still deciding which vpn to use; Phyber or nvpn.

Anyone have both of these vpn before?

Andro Tricks - April 1, 2020, 4:14 am

use port mapper tool

open port without access router

<https://upnp-portmapper.sourceforge.io/>

need any help tell me on telegram - @urfriendandro

Yes, that is absolutely right. All you have to do is download and install something called [OpenVPN](#). Once you do that you have to download the configuration files or your profile from Phyber or nVPN and put it into the "config" folder of OpenVPN.

Once you do all of that all you have to do is press "Connect", then open the port through nVPN or Phyber (I'm pretty sure nVPN and Phyber both provide guides on how to open a port).
