Everyone can now join!

Who is OP8?OP8 is made up of a small group of highly trained individuals in various software and security fields.

OP8 strives to produce AAA quality products and services to the HackForums community.

OP8 staff and team members share in all the group profits. (Get paid to be in a group, not the other way around!)

OP8 members will receive professional training, private methods, exclusive offers, and much more.

Not just another group...

The core OP8 team is a skilled group of software developers, security researchers and systems engineers with experience in different aspects of the information technology industry. We strive to share and collaborate but most importantly learn about how things work. Coming from different groups throughout the internet, our core team has been active since 2001. We have a burning desire to understand the systems that we use most often, to try and exploit them. Not only to benefit

ourselves, but to benefit those that use them. We aren't a group of hackers for hire. We are not a political movement or cause. We are a group of people who like to push the boundaries and question everything.

I knew I was getting accepted. That's what a true OP8 would do even if we get out of the group once.

Again a great day for me to get accepted. Thanks.
