WordPress Spammer Evolution V2 is a advanced way to load WordPress.com blogs with fake comments. Basically the user just need to write a keyword to research, for example: Hacker 2020 and this will return up to 100 results for blogs talking about hacker with posts from 2020. From there a user just need to click in the link that will redirect to the comment section and write a comment. WordPress Spammer Evolution V2 is useful if the user wants to increase the number of comments poiting to the user site with comment spamming.

Pros

- Free, for now.
- Reduced page load
- Directs directly to comments

Cons

- Duplicate results may appear
- Only WordPress.com blogs are supported
