Thread: [I just won 250 bytes in slots game](#)

Anuta - April 2, 2020, 3:11 pm

As the title said, weirdly today I had some luck on this slots game. Just in my third spin I managed to hit the three figures.

It's not a big deal but I wanted to know if you guys play this game and if you had any luck with it?

Luca - April 2, 2020, 3:12 pm

The only reason I play it is for the dice award. I prefer blowing all mt bytes on blackjack.

Yep same. Once I save enough bytes, I am going to start playing like crazy.

All-Time Spins: 18,929 Spins

And 521 Blackjack games. This award feels impossible

You just gotta keep playing slots mate or black jack if you play slots just 1 byte spin and see how your luck goes .. Some members prefer black jack but i won my dice award on slots 1 byte betting just give it a go for a while .. Best of luck ?

You mean on the first try?

Cause I won my 250 bytes by betting 1 byte, but it was after 2nd spin.

Just keep playing slots but just betting with 1 byte . I know it's difficult at times because you always want to bet more .. But just keep playing betting 1 byte you might get lucky ?

I normally open a few tabs and just play slots and then reply on posts and play the hack game then back to slots then your always doing something and not getting fed up with just doing the one thing like playing slots ?
