Thread: [VALORANT Beta Key Streams](#)

Xen - April 3, 2020, 12:43 am

VALORANT Beta keys are dropping via twitch drops today on certain streamers.

One of them being ONSCREEN (<https://www.twitch.tv/onscreen/>) not sure of any others but this game does look like something worth getting.

Just open the stream at 6pm GMT and mute the tab (don't mute the stream otherwise you count as inactive) and hopefully you'll be able to get a drop.

Lemme know if anyone gets a key and maybe we can squad up and play ?

I'm still waiting to see if it will flop hard or not lol. These "OW" type of games don't seem to last.

It's not really a OW type game though, the best way I've seen it described is if CS:GO and OW banded in RIOT's bed lol

I guess but at same time it can be said that's it's not like Csgo either. A lot of people compare it to cs but why what really makes it a cs type of game beside a buy menu? All that ability bullshit isn't Csgo.

Well the movement, spray patterns, slow game play etc is all meant to be close to CS. There's a bunch of CS players that are planning to move to it as they feel it's just more of a "updated" CS which sounds really good to me tbh

I guess us plebs won't know until the beta opens though

I dig it I guess it makes sense to most but I still don't really get the connection :/. No one compares SnD in COD to cs yet it's the same mode. The "spray" patterns in valorant I feel like will be either good or bad since theyre making fake guns so they get to make their own recoil. AFAIK, no one

discussed recoil on any of the guns yet.

Well they always plan to jump on the new game. For hype, for sponsor, for whatever and end up going back to the original always.

Yeah but CS:GO is really dying right now, VALORANT will be the new competitive FPS.

CSGO broke it's player record a few days ago, not dying

Prince™ - April 3, 2020, 10:49 am

I'm on Summit1g's stream trying to grab a key.

Fingers crossed.

T.NICE - April 3, 2020, 11:05 am

They aren't keys, it's a Twitch drop direct to your Riot account.

I just got one :D but TwitchRivals, Timthetatman, Summit, Onscreen and more all have drops available.

Competitive scene will die once VALORANT's public release is out.

It won't trust me, CS:GO is live more than ever.

?nnie - April 3, 2020, 2:11 pm

Lol this is a horseshit way to get keys. No luck at all today.

Xen - April 3, 2020, 2:16 pm

Anyone get a key? Me and one other friend has gotten one. I'm enjoying the content still even after getting the key so imo it's nice that you can watch more gameplay and have a chance to get a key.

Demize - April 3, 2020, 2:36 pm

got tabs open, do you get a notification if you get a drop?

Xen - April 3, 2020, 2:41 pm

Yeah you get an email and Twitch notification.

Make sure you don't have the video muted because otherwise you're counted as an inactive viewer
- turn the volume up and mute the tab (right click twitch tab, mute)

Onte - April 3, 2020, 4:08 pm

Can someone please sell me a account with beta... LMAO I wanna play so bad haha

poisson - April 3, 2020, 4:16 pm

So apparently only two regions are eligible--NA, and EU. 25k keys allocated to each region. 750k

people currently watching.

Not looking good boys.

You might have to multi-account, having multiple streams open while on the same account won't increase your chances.

correct, you can multi account on the same ip

Gilbo - April 4, 2020, 10:14 am

I really don't see what the hype is about, it absolutely looks trash.
