Free Alpha Test - Undetectable Escape from Tarkov Network Radar - Clutch-Solution

Hello, we are proud to announce our new project for Escape from Tarkov

[Video: https://www.youtube.com/watch?v=42vlucNqgGs&feature=emb_title]

During the alpha phase we need You to give us feedback and report bugs.
The Alpha test will last about 3 days~

Download contains 4 maps; ~500 mb

Status: [Alpha Test] (Stress test for our servers)

Alpha feature list:

- 2DRadar
- High performance network code, no delay (if you use ethernet cable)
- Camera zoom, follow, panning
- Scanned maps based on ingame world
- Player line of sight
- Player height (difference to your current position)
- Show team
- Show pmc, scav, player-scav
- Items, Filter by rarity
- Items disappear on pickup
- Kill Feed

Currently in work:

- Ultra high resolution maps
- Adding raiders
- Item filter full customizable
- Kill feed
- Hit indicator
- Item from containers
- PlayerHealth and stats

Requirements:

- Second device (with windows 10, newest version)
- VPN

<https://www.clutch-solution.com/>

How-To:

1. Visit our website to find steps on how to gain access.
2. Once this is done, start the radar before you connect to a server

3. Have fun!

Please give us Feedback & Bug Reports.

Best Regards.

Might wanna try on other forums if you ain't finding anyone on here

Dabeo - April 18, 2020, 11:21 pm

I'm willing to test if you're still looking for more testers
