I see alot of people looking for smtp etc etc.

I am offering to teach you how to create your own smtp on a mass level 10+ smtps using the same configuration. They wont be inbox, but they will hit junk
And they wont say mail exceeded or any of this bs.

Each time you create them itll cost you \$1 and you can create sometimes 50 smtp per time.

I am charging \$200 for this, full teamviewer demo MM is accepted

Payment is by crypto only

Paypal maybe considered for very trusted members

Its for mass mailing, i see alot of people here trying to establish mass mailing. It wont hit inbox because MASS wont hit all inboxes, but itll allow for low priced mass mailing easy and effectively
