Expherience - April 5, 2020, 9:50 am

Greetings HF,

It brings me great pleasure to introduce you to OptiOptions.

I created this service to help traders become self sufficient by learning from the mindset of a seasoned trader. All information posted on my Twitter is for educational purposes only and not to be considered financial advice in any capacity.

It is up to you to make the most of this experience and harness all of the information provided to improve yourself as a trader. If you are dedicated, disciplined, and open-minded, you will improve as a trader and achieve your goals. I am proud and honored to be apart of your journey.

A month:

[Here #3](#)

FAQ:

Do you offer vouch copies for your service?

I will be offering 2 vouch copies to 2 trusted members. You will have 48 hours of my service.

What does an alert look like?

Here's an example on an [Alert](#)

Do you have documents outlining past performance? (Profit/Losses)

I do for my own account, but not for OptiOptions.

I'm starting that now and even tracking the losses for this service to have full transparency. The goal is to cut losses quick and admit when we are wrong and to let the winners run. I'd rather be wrong and make 100k then be right and have my pride.

Is your service a monthly subscription?

Yes. If you sign up on the 5th of April, your subscription will need to be renewed on the 5th of May after market close 4pm EST.

Do you have any coupon codes or promotions?

If I have any promotions, you will see them on the public twitter!

Do you have a chat room?

No, I do not have one at this time. However, I am actively developing one and will be launching it on discord not too long from now.

I have a full time job, how can I best utilize this service?

Do your homework when you have the ability to do so. Read the daily market recaps, stay up to date with the news, take notes of all key levels of support and resistance, and construct trade plans in advance for the upcoming day/week.

Stay focused on only a few names at a time

Set alerts for key levels of support and resistance so you can be notified when key opportunities are approaching (chart service like Trendspider or TradingView)

If you are unable to manage your position, consider setting STOP losses (trailing, key common stock levels etc) Do not blindly walk away from trades. Only trade on the days you know you can devote the time necessary to properly execute your plan.

If the above still doesn't work for you

I offer a Lite service. This Lite service contains all weekly charts, ideas, & access to educational documents. This service is most suited for people who do not desire the alerts, yet value the setups and ideas around them. This has been a good balance for people who cannot take full advantage of the Pro service. If you wish to downgrade your account, please send a PM on here or contact me on the Twitter.

Pricing:

Pro - \$140 a Month.

Lite - \$70 a Month.

Markets opens in 15 Minutes. Will be posting on the private Twitter today my entries and exits. Check back to see the EOD results for 4/06

interesting service your offering are you trading through TD investing? and is it stock only the singles are for?

Bear - April 28, 2020, 5:35 pm

Been taking me a month to develop a platform as such to get people together here. Good luck!

Skooppy - April 28, 2020, 6:02 pm

Do you still have this service?

The Don - April 28, 2020, 6:08 pm

I'd be very interested in a vouch copy, PMing you now.

Thank you! I wish you the best of luck with that platform and am really interested in that project. Do you have a thread on it?

Options are so lucrative I love it. As long as you're good at managing an acc and your risk tol you can do extremely well if you have the rest lined up.

Skoopy - April 28, 2020, 10:29 pm

Options are a bit interesting to call. I've been doing options trading for about a year, do you have a vouch available? Also what app is that are you using in your screenshot?

If you start the contract before the second person you may have it. I use TD AMERITRADE think of swim platform for options.

Hi,

Do you know if there is a way to trade depositing and withdrawing through BTC?
Cause Bank are a headache here and we can only withdraw \$300 monthly, which ofc its too low.

Thanks!

Nalright - April 30, 2020, 3:31 pm

Price is high for just a twitter and not a chat room / platform for people to learn and interact.

Hello! I'm not 100% sure with that atm, but i'll look into this and update my response for you if I find a solution.

(Apr 30, 2020 02:12 PM)victoroshi Wrote: [\[CITE\]](#) Good to know that you are offering this type of service. Nothing is better than to have profit as a trader and minimize your risk level, that is why I am sticking with the friendly interface of KoinPro

I know right, makes it much better. All jokes aside, it doesn't minimize my risk level. It makes me less emotional and willing to let the trades fully unfold. Most people stop out of trades due to investing too much \$\$ and they aren't comfortable losing it. That's why you probably sell for a loss and then when you look back 30 minutes later you would've been 30% up that hurts.

\$50 a month for signals and learning to become a successful trader and learning how to manage an

account is cheap IMO. The service will expand as more members join. I already have pdf's to rollout to members. If you think it's too much, this isn't for you.

Options is for those who can lose 100% of what they invest I say. It's like someone playing the lottery, but you have much higher odds. If I were to tell you if you spent \$20 on a scratch off and you had a 1 in million chance to win that's pretty shitty odds. What if you had an option signal and it had a 67% chance of making you money? You'd more likely do it then the scratch off.

Only invest what YOU are willing to lose. If \$50 is a lot for you, come back when you have more \$ to invest. This is too early for you.

I don't on BTC in particular, but learning support / resistance levels can be applied to BTC.

Don't worry I don't get upset about real questions like people with shit e-books on this forum. I do give entry exits and what position holding is left. If it's 1/2, 1/4, 1/8/ and so on. I do lottos which is 1/10 of a full position and I do rerolls or rollups too with profits to minimize emotion.

Still giving more vouch copies. Kit never left a review as intended so looking for someone willing to leave a review.

Expherience - July 2, 2020, 6:56 am

Still providing this service. Just made \$1200 today on some risky AMZN calls last night.

Slots still open for vouch copies as long as you provide a review! Please help your community and actually leave a review. Plenty of people are waiting for your words to help them make a simple choice.

Nice man, any discord group or any other platform for tutoring.

Do you have any experienced reviews from anyone here? What's your p&l last 3-6-9 months?

(Jul 3, 2020 11:48 PM)Bear Wrote: [\[CITE\]](#) Do you have any experienced reviews from anyone here? What's your p&l last 3-6-9 months?

Hey Bear!

I do not have any experienced reviews. I have a vouch to Kit and he failed to leave a review.

As for my p&l I do about 25% acc growth a month being more realistic. The market is a little more harder to play right now, but the moves are huge when we are prepared for it leading to some huge gainers. I've had plenty of 100% and a couple 500-600% plays even a 1000% one.

Although, I recommend members don't follow my sell alerts and to manage their own account as they seem fit to their risk management.

Just because I'm willing to hold for a -40% loss and the play can go to zero because I'm playing with a bigger account or more profits it would be silly for you to follow that play with a small account.

If it's good enough for you to screenshot the gains, you should lock the gains.

Don't just grow your account and keep playing with a bigger amount, lock your profits to your bank account so the market doesn't take your \$.

Expherience - July 15, 2020, 6:19 am

Just transition from twitter to discord and I feel it is a much better platform to give out alerts.

Made \$2,000+ last week. Send me a pm or comment below if interested in a 48 hour vouch copy!

Hi,

Those \$2k, where made from how much balance?
And did you find out if there is a way to trade with crypto?

Thanks

That particular account was a smaller account under \$10,000. I have another account above

25,000, but with options it doesn't matter if you're a cash account PDT rule doesn't apply to options.

The 2k I don't remember how much balance on top of my head, later on I can check my excel sheet for the specific amount. If I were to guess, I'd say 5,000 was spent.

For the crypto, sorry not that I know of.

Thanks mate.

For now, i will just follow it, cause i dont have any source to trade with options in my country.

Good luck!
