Thread: [Expert programming service - 10yrs experience \(LIMITED TIME SUPER CHEAP\)](#)

uint32 - April 5, 2020, 4:59 pm

Tired of paying shitty developers that deliver buggy, broken or overall bad software? Tired of paying for projects and getting less than expected?

Look no more. I am an expert developer that's been programming for over 10 years and has been in the working industry for over 7 years.

I have experience in:

- C#
- Html
- Css
- Javascript
- Typescript
- Vb.net
- Vb6
- MSIL
- ASM
- Java
- SQL
- Some C++
- And more (just ask)

I have a lot of experience in the industry, from setting up servers, configuring virtual machines and writing very large team projects. I follow industry design patterns to make my code fast, clean and easy to maintain.

Frameworks/libraries:

- Angular 2+
- React.js
- Vue.js
- WPF
- Winforms
- Xamarin
- Qt
- Pinvoke (native windows functions)
- Cheat engine/memory manipulation
- Tensorflow
- Tesseract OCR

Considering the coronavirus quarantine, I do not have much to do. Hence I will be programming most of the time.

This also means my rates will be extremely cheap and you should expect very fast delivery.

I can offer:

- Tutoring
- Small jobs
- Fixing/modifying existing code
- Medium projects
- Tools
- Bots
- Assignments
- Server configuration
- General help
- Whatever you can think of really

Past projects:

- Keylogger
- Proxy scraper
- Email scraper
- SSH cracker
- Amazon cracker
- Social media bots
- Web admin panel
- Web browser games
- C# obfuscator
- Crypter
- Custom winform themes

Much more

I won't judge whatever your project is. Whether it be big or small, legal or not, easy or complex; I will complete it as fast as possible with professionally written code that's easy to maintain, bug free that can be easily understood by other programmers.

If you've ever wanted to start a project, wanted to have a small tool that could help you or just have a school assignment due. NOW is the best time to make it happen.

You can see my github at : <https://github.com/uint32labs>

Have any questions?

PM me now or add me on discord to discuss, I reply very quickly.

M00nD3v - April 6, 2020, 12:03 pm

Looks interesting.... I just hit you on discord with the same username. Let's talk

AI-informacionas - April 7, 2020, 2:16 pm

Do you have any experience with Django? If so, send me a PM with your discord.
Thanks.

kray - April 7, 2020, 2:53 pm

Dope, I'm going to hit you up, as I feel the whole COVID-19 free time woes, am proficient in many languages you are also, and would love to work on a project with you.

uint32 - April 7, 2020, 3:46 pm

Great, I'd love to work on new projects!

Add me on discord: uint32#5455 or send me a pm to we can discuss the details.

To everyone else,

I'm currently finishing some orders but im still open to new offers, send me a PM or hit me up on discord!

Killcorona - April 7, 2020, 4:22 pm

my problem is discord. i hate that thingy. any other chat? jabber? telegram ?

uint32 - April 8, 2020, 1:16 am

I do have XMPP, I'll send you a PM with my info.

Okehzie - April 8, 2020, 9:58 am

Do you do game hacks? It's EasyAntiCheat protected tho.

Nebula Sunrise - April 9, 2020, 1:35 pm

OP helped me with a coding exam and I can say that I will pass with flying colors.

I experienced great service and great communication throughout the process.

Thanks, OP!

demografia41 - April 22, 2020, 1:57 pm

Hi how are You? Please sent me Your jid. I have one project for You.

Yshanks - April 28, 2020, 3:50 am

Sending you a message need some work

Kean1337 - April 28, 2020, 6:47 am

I looking for some who has knowledge about reverse engineering, ASM or just know hot to decrypt encrypted (bz2) file. I want to decrypt file with Sprites (graphics) from modded Tibia Client or just extract them to .png

wtf - April 30, 2020, 4:40 pm

Best coder you can find on HF.

Before him i went through about 6 other coders but none of them really seemed to care alot about the project.

I offered to pay him upfront about 3 times but he only wanted me to pay after the job was finished.

I sent him the source of my project and we pinned a date when he would help me.

Before we started he offered me to record his own screen while showing me how to fix the problem so i could watch it back.

And when he started screensharing he was prepared and had allready gone through the code so everything went smooth.

Overall experience: 10/10

Drunk - May 6, 2020, 8:05 am

The title is true. It is REALLY cheap. He made me a awesome tool in C# for just 40\$. I'd say this is one of the best, cheapest and fastest services I have seen so far.

Highly recommended!

Thanks a lot for the business! It was a pleasure working with both of you.

Since I am overloaded with work at the moment I will be closing my services down for some time.

However you can still send me a message on discord if you need something, I might be a little slower to reply but I will try my best to answer everybody.

Money Man - October 20, 2020, 3:08 pm

Very smart guy, thank you for the help with my assignment! :) <3

(Oct 22, 2020 12:19 PM)Yodag566 Wrote: [\[CITE\]](#) Huge vouch!

Worked with him on a larger project and he is extremely helpful and makes sure the product is perfect. Can really recommend

Thanks a lot for your projects, it was a pleasure working with you

I can't edit my thread so here are a list of a few jobs i've completed:

- Instagram turbo (70% faster than the competition)
- Instagram auto/first commenter
- Instagram account creator (automatic email & phone verification + 2captcha support [not selenium, pure http])
- Full website aswell as backend api (written in php)
- A few python assignments
- Automatic album distribution bot for private website
- Live coding exams
- a few more that I can't remember

I'm quite busy at the moment so i'll only be taking high paying jobs (I charge an hourly rate) however if you really need help with something don't be shy to hit me up.

citsejaM - October 25, 2020, 5:48 pm

Vouch he did some work for me, thanks
