Thread: [Blogger Spammer Evolution V2 - A advanced way to make blogspot spam comments or resea](#)

flexing_99 - April 6, 2020, 8:56 am

Blogspot Spammer Evolution V2 is a advanced way to load blogspot blogs with fake comments. Basically the user just need to write a keyword to research, for example: Hacker 2020 or any other terms related to your area and this will return up to 100 results for blogs talking about the term. From there a user just need to click in the link that will redirect to the comment section and write a comment. Blogger Spammer Evolution V2 is useful if the user wants to increase the number of comments to the user site.

Note: May contain duplicate entries and its useful for research on any topic...
