Thread: [Minecraft: IP Banned on Hypixel](#)

Kakarot - April 7, 2020, 5:49 pm

Hello guys, a couple weeks ago I was banned on Hypixel for using cheats.

I think that the server banned my IP because every time I try to log in with an alt, it gets perm banned because the "account has been compromised"

I have also tried using a VPN while logging in but does not seem to be working.

Do any of you know a way I can fix this?

you can start off by not cheating, any big server like that would block the use of VPNs.

Rayner - April 9, 2020, 7:34 pm

If you have a dynamic IP just unplug your router for a bit. But yeah, these big servers add nearly every public VPN to their list or they've been used before.

Not an IP ban, its a known alt or such. I used to go through alts all the time some would be compromised and some would not. I think its if they detect an excessive amount of different IP's from one account. But I can assure you I cheated with no VPN on and can still play there on my main account etc

Yes, but I believe I cheated excessively on many accounts with no VPN. Maybe I'll try something else.

People don't mac spoof these days? Super simple and you'll get a new IP.

FaceTehWind - April 14, 2020, 9:35 am

Step 1: Reset IP on router if you got a dynamic IP (doesn't matter too much if your going to use a vpn but just incase you log in without a VPN or something)

Step 2: Use a VPN or some proxies im pretty sure vpns work on hypixel since i used them previously on hypixel but that could have changed now (look for a vpn which isn't blacklisted or constantly used for that x task)

Step 3: Buy non public alt list or obtain them yourself (around 4 cent per alt for NFA, 10 cent for confirmed hypixel unbanned alts etc)

Step 4: Use a good client with good settings
