FAQ

How are the chips transferred?

I will be manually transferring the chips to your account without getting banned. It takes less than 30 minutes from the time your order is approved.

However, I do not take any guarantee regarding the ban. (Never got banned till now though)

What information do you need?

We need your FB Email and Password. We don't even login on your FB account, we just provide it to the system and it automatically logs in on zynga poker and transfers the chips to you in a secure way. Your zynga and fb account is safe and there's no chance for it to get banned. If you don't feel comfortable with this you can create a fake fb account or make a temporary password and then change it back after your chips are transferred

Have you bought chips?

Vouches require a contract, otherwise they're not valid.

Ive seen legit services that do \$15 for 200bil

So what you have "seen" services do lower prices? I have as well, but I don't see them anymore. It's supply and demand.
