Kompers - April 9, 2020, 2:50 pm

Messaged you on jabber with a few questions about how you acquired these RDPs and a few other specs.

it has to be bruted. OP is selling them bulk, and there's only few ways to get them bulk including Bruted, carded, or using the aws method or similar method on another provider. Also, he's not providing a warranty.

Thanks for your post, but I can't agree you with last part of your sentence, if you read my sales thread image I have replacement feature if RDP goes down within 48 hours I'll replace it.

I'm online and ready to take sales

This user is benman who previously got banned for selling "RDP method" which was sticky keys slayer. I just searched for jetx Discord and saw that he changed his name to jetx and still had the same messages that I've had with benman. Fucking ridiculous \$500 for sticky keys slayer

And after I bought his shitty method, he kept messaging me offering me other shitty methods trying to milk me out of money. Clearly some poor Indian monkey
