An OP8 Production

ArticleForger | High Quality Article Creation

What is ArticleForger?

We take key-words and generate unique readable articles based on those keywords.

We have an ArticleForge licence (you can just google them) and we re-sell it on to you...pretty simple.

Here is a 200 word example article that was generated using the keyword "Hacker" and sub terms "malware" and "netflix"

Spoiler ([Click to View](#))

It is my personal belief that having a high quality antivirus program is the most important step to stopping a hacker. Having a quality antivirus program installed on your computer will give you the best defense against any potential hacker threats. In order to get the most out of your antivirus protection, you will need to make sure that it includes a virus database. A virus database is a database that can provide all the necessary information a virus definition file would need to know.

Having a threat of malware in your computer can also be very dangerous. Malware can be of many different types, but most commonly a virus or spyware is created to have the ability to change your computer settings to prevent you from being able to fix the problem. If you don't have a good antivirus program installed then chances are that you will end up installing malware, which is a type of virus. It will not take long for the most basic of computers to be infected with malware, so it is important that you install the latest version of an antivirus program that is compatible with the software that you use.

It has been reported by many users that they had their computers infected with malware after they had Netflix installed. Netflix is a popular application and there are many people who have it installed in their computers. If you don't have a good antivirus program installed then chances are that you will find that Netflix becomes another website that a hacker can attack and infect your computer with malware.

Nice job putting that sub to good use. This is one of the best literary tools one use for paragraphs, essays and blogs. I was surprised how good of prose it could generate. Great service.

I've been a subscriber of theirs on and off for years now, good service for what it is.

No point in paying over \$300 a year when you can buy them for a few bucks here.

GLWSTied in with their WordPress auto poster it's a great tool for making fast populated blogs for safe pages or other seo needs. I love the service but understand if people don't want to spend the 300 bucks themselves.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
