Thread: [Voice Chat About Mobile apps / Website?](#)

Affordable Solutions - April 11, 2020, 8:41 pm

I want to find a place where I can chat with others about mobile app ideas I have and bounce around ideas. Maybe even find people to work with.

Anybody know of a great place where I can voice chat with people about this?

I appreciate your time for reading this, thank you very much and stay healthy!

You can find people on HF too

Go to the coding section there is a Android Development section where you might find some people there interested in mobile apps and then maybe chat with a member on PM with your ideas.

You can also definitely find someone to code for you.

Nothing. I just have no contacts on Skype and know of no Discord groups.
