Thread: [Whats the best way to find SQL vulnerable websites](#)

lostquotez - April 11, 2020, 10:40 pm

i would like to know whats the best way to find vulnerable websites for sql injection for defacement

~**[DogiD]**~ - April 11, 2020, 11:24 pm

Google dork, this is from 2011 but it still works <https://hackforums.net/showthread.php?tid=1399276>

Finding SQL Injection in modern sites is tricky.

Most of them are already patched OR they are using REST API or GraphQL or other methods to ask data from Database instead of querying.

find manually the vulnerability via google, thats the only best way

cracker.toni - April 12, 2020, 2:02 pm

apbank.ch/index.php?id=18

vulnerable?

can some one help me with this?

This is ILLEGAL. Do not deface/attempt to hack for blackhat reasons.

For a massive finding of SQL Injections, just use dorks, but not only with `inurl:"id?=...."`. Try to look for errors generated by different databases.

If you want to find SQL Injection on a specific website, that is a different topic and you have a lot of options.
