Thread: [\[CS:GO\] Would you buy any rank boost?](#)

It's been ages since I boosted people in matchmaking. I'm currently level 10 on faceit and as you all know, world is going thro a difficult time and I'm in need of making money.

Now the question is, would you buy a boosting service? do you think i would be able to pull some customers?

I've got some vouches from my previous thread (back in 2015 tho).

No, there are already many boosting services out there or people have enough cheating friends are at this point are decent in the game anyway to get the desired rank themselves or know where to go.

So in the end it is not worth it to start again now..

Maybe for faceit/esea but I highly doubt anyone will pay for mm boosts these days.
