Thread: [How to finde vulnerable website](#)

JavaZeusiii - April 13, 2020, 2:34 am

Hello, how do I find a vulnerable website that also has something to do with payments without having to spend 10 hours looking for it myself?are there any tools? I always search very long and when I find something, it is very outdated and does not contain any content.

I think you should do it by yourself...What's the point of using a tool that you don't understand what's doing? Most of times tools can't help you.

Anyway you can't think to do something 'without spending your time' .

Hello my friend

I suggest Google Hacking Database to find the dorks and their descriptions

Quote:<https://www.exploit-db.com/google-hacking-database>

All public dorks from old to new vulnerabilities is available in GHDB
