Is it just me? Or have you guys seen in influx in brand new members? I'm seeing more BR 0-0-0s than ever trying to trade. Just weird, past few days maybe 20-30+ trying to trade with never a deal.

Idk, thought was goofy.

I've noticed that too. Lots of no-pfp members messaging me on discord with BR 0-0-0 once they verify their HF.... and then have the audacity to get annoyed when I'm not willing to trade with them.

Haha, a guy yesterday who did have 10 or so, but was a month old and wanted to do \$50 Venmo called me a little biatch, said you broke boy? Won't trade with me? \$50 is nothing. Lol, was already on the fence, that made me say nope, no way. I reduce all the risk I can, that's how you stay profitable, smh, I get it's frustrating, but if you are really 100% legit and need crypto and can't get it here, go to a crypto ATM, go on coinbase, something.

Yeah, and I'm more than willing to say "yeah, not trading with you" in order to prevent risk.... I won't lose ANY money not trading with you, the demand is too high I'll find someone trusted in a couple hours.
