Thread: [This may be my farewell to HF, + making all my Projects over the years Public](#)

Cryptic™ - April 14, 2020, 9:53 am

Hey there,

I've been on HackForums for a long time and have been pretty inactive over the past two years as I've gotten older and have other priorities in life now.

I was cleaning out my hard drives and came across my old HF projects.

Instead of just deleting them or archiving them, I wanted to make them public to help educate the younger generation here as I'm sure they can use my projects to build projects of their own

I've put everything on GitHub

<https://github.com/DevCryptic>

CrypticVPN was my most successful business and I made close to \$80,000 from it. I decided to sell the VPN business when I noticed the HF Marketplace for VPN's was dying, and the new owner drove it into the ground and it's shutdown.

[CrypticVPN | \\$19 LIFETIME | 1-10 Gbps | Port Forwarding | Offshore | DDoS Protected](#) Note: The CrypticVPN client source is not available as I lost that over a year ago

MyAltCoins is a CryptoCurrency Portfolio I started as a side-project. Other HF users beat me to it but it's still a fun lil project none the less. I built it using parts of the CrypticVPN code

[MyAltCoins.net | Easily Track and Share your Investments and Profits with others!](#)

OMC-Rates was a site like Preev.com I created when Omni-Coin was a thing years ago

[OMC-Rates.com | Your Preev for OmniCoin | New Features Added!](#)

I used to own the group 'The Brotherhood' on HackForums many years ago and we had a signature generator.

You can check out [NuWorld's](#) signature. The script is also available on the GitHub, you type in whatever you want and it creates a 'Brotherhood' themed signature for you to use. Credits to Disease for making this script

I've had many other ventures and businesses on HF but not all of them required me to build a website/code, like my drop shipping experiments, or selling stuff. This is all I could find.

Everything I could find is public, all the source code is available, some projects will just be lost forever. Do with it what you wish. Modify it, study the code, learn something, build your business using it, I don't care as long as you put it to some kind of use.

If you need help getting anything running you can post in this thread but I can't promise I'll be around to help.

Any questions or concerns post below.

Please share this thread with your HF friends in your group chats. I'm sure lots of people can put this to good use.

Nice initiative. I'm sure someone can use this.

**Almonds** - April 14, 2020, 9:55 am

It is very thoughtful that you have made these public. You are inspiring!

**Dorrance** - April 14, 2020, 9:58 am

Congratulations bud it's good to see you around.

**Parks** - April 14, 2020, 10:00 am

Jeez man, what are you up to in life now? Still online ventures? Physical biz? Taking a mini retirement? lol

The first few weeks of not working and doing whatever you want is great, but then you get bored and you need to find something to fulfill you. A 9-5 job is not what I want to do for the rest of my life.

I travelled to Mexico last December and was in Portugal in February.

Too young to retire, I want to start up a real business but have no ideas right now.

Graduated university las year, and got a job in cyber-security because of the boredom and am working from home for the next few months due to the corona virus and thinking of what my next business venture should be.

I want to do something meaningful that'll leave a legacy for my kids (eventually when I have them), and also something that will help other people. I just don't know what that is yet.

**Scooby** - April 14, 2020, 10:06 am

Good on you for passing it on rather than just trashing it. Glad to see a little philanthropy. And congrats on making a million! I can't even imagine what that would be like lol.

You're definitely an inspiration, mate. How old are you if you don't mind me asking? You seem to have a lot figured out pretty early into life.

Why not take this time to try out new things? Hobbies you've always been interested in. It's pretty easy to turn what you love into a career these days. I'm 28 years old and still trying to figure out exactly what I want to do though, haha.

**Cyam** - April 14, 2020, 10:12 am

I remember you from long time ago. You were quite popular so to say. It's kinda depressing reading your post, but I guess everyone will eventually move to bigger things and won't have time to stick around.

I wish you good luck in future ventures!

**Luca** - April 14, 2020, 10:12 am

Very generous of you to release these. Thanks buddy.

25 right now :)

I'm a very out-doorsy person I hate being indoors and this corona virus quarantine is driving me crazy. I can't go outside and do the things I wanna enjoy and it looks like it'll be like this for at least 6-12 months.

As for doing what I love career wise, I have yet to figure that out. I got into cyber security because it seemed interesting but I don't get so excited about it now days. I'm more interested in Azure/Cloud consulting so I'll look into that. I need to get my CISSP because I've been putting that off far too long.

**Yin Yang** - April 14, 2020, 10:18 am

Congrats on the great accomplishments my dude!

**Drug Problems** - April 14, 2020, 10:20 am

Holy shit bro.

First off, congrats on obtaining all of this success and moving on with your life. Second off, thanks for making everything public thats huge. I've seen you around the forums for years, all though I don't

think we've done any deals it'll be sad not to see you anymore.

Good luck in whatever life brings to you next

**V?rt** - April 14, 2020, 10:21 am

Dang it's sucks but it's great all at once. I hope you have a great adventure and success on future projects.

No, but I have been looking at listings and am expecting ppl to panic sell at lower prices. I probably will own a house by the time this corona virus stuff is over.

Nah , Crypto is great guy and he will be fine. He was bored and I remember on old glory days of HF. I was there also, been in your position Crypto as now, and started real business although offshore working on legit marketing to make more money that to give to the countries as tax :)

Whatever you will start you will not be the wrong man.

Better act than do nothing.

This is not our style after all.

Long live HF and my brother forum BHW for all eternity.

**humanbody** - April 14, 2020, 9:05 pm

I just woke up and one of the first things I read in the morning is this one. Such an inspirational post, it really motivates me when I read of how much you achieve at what age. All I can say is that you are a smart man and know how to make money.

Thanks for the kind words and wish you a huge success in your life!

**Nate** - April 14, 2020, 9:06 pm

RIP Cryptic youve been a legend on HF. I hope you know who I am

Farewell Good ol friend

**cyberducky** - April 14, 2020, 9:13 pm

Oh Cryptic it has been a long ride my friend. Us old heads are all grown up with families now. Good luck on your journey old friend.

**shitmaster** - April 14, 2020, 9:19 pm

Thanks for everything you have done for this forum and all the best with your endeavors.

You have spoken really wisely for someone who is 25! You have also made way more than many could in life at that age. What's great is the willingness to share what you have built throughout the years with everyone. Can't imagine many would do that.

I've just started learning to code. I hope once I am a bit better at understanding how it all works that I can study your code a little more.

Bookmarked this thread and your GitHub. Also I hope you'll stay around!

Thanks and be safe Cryptic™

**Werd** - April 14, 2020, 9:35 pm

Thank you so much for all your years of contribution. I remember OMC way-back.

I hope your future continues to be as prosperous as it has been this far, and good luck to you!

**Zyptic** - April 14, 2020, 9:56 pm

Congrats bro!

I remember seeing you all around for the last 10 years since our names were always similar. Always popped out lol. Congrats to that million. Sharing is caring ;D

Again congrats and hope the future is bright :)

Nope, Omni shut down the project and all the coins turned into nothing and will never have any value. The bytes system basically replaced it and works much better.

I have some crypto that I'm just sitting on, but I have not been actively tracing crypto in the last 1.5 years. Just sitting on what I have, which includes a ton of ripple as I believe that coin still has a lot of potential in the long term (3-8 years).

Although depending on how this corona-virus stuff goes, if the markets continue to plummet which I anticipate they will I will probably pick up some cheaper coins to add to my collection.

Damn i actually enjoyed the omni coin craze, realistically i knew it wouldn't ever go anywhere but it was being used in the hf market for awhile.

**Cryptic™** - April 19, 2020, 9:13 am

HF has been great.

I started using HF in middle school but when it really took off for me was in high school.

It's where I learned about business, It was like a playground, where unlike the real world, it was okay to make mistakes, that's how most people learn, it's where I got to put ideas into reality, and prepared me for the real world in a lot of ways. And one thing lead to another... if you look at my feedback thread from years ago, I came to HF looking for rune scape hacks, then I got into webhosting, then the VPN business, then crypto and many other businesses along the way.

Biggest thing I took away was, customer service is what keeps people coming back and builds loyal customers, and set's you apart from the others, and that's what set my VPN apart from most other VPNs back in the day. My main focus was always on providing fast, and efficient customer service and ensuring the customer experience was great.

Anyways, I've wrapped up all loose ends here and closed all business dealings, I'll pop in once in a while, until then, this will be my final post.

Toodles

Instead of just deleting them or archiving them, I wanted to make them public to help educate the younger generation here as I'm sure they can use my projects to build projects of their own

I've put everything on GitHub

<https://github.com/DevCryptic>

CrypticVPN was my most successful business and I made close to \$80,000 from it. I decided to sell the VPN business when I noticed the HF Marketplace for VPN's was dying, and the new owner drove it into the ground and it's shutdown.

[CrypticVPN | \\$19 LIFETIME | 1-10 Gbps | Port Forwarding | Offshore | DDoS Protected](#) Note: The CrypticVPN client source is not available as I lost that over a year ago

MyAltCoins is a CryptoCurrency Portfolio I started as a side-project. Other HF users beat me to it but it's still a fun lil project none the less. I built it using parts of the CrypticVPN code

[MyAltCoins.net | Easily Track and Share your Investments and Profits with others!](#)

OMC-Rates was a site like Preev.com I created when Omni-Coin was a thing years ago

[OMC-Rates.com | Your Preev for OmniCoin | New Features Added!](#)

I used to own the group 'The Brotherhood' on HackForums many years ago and we had a signature generator.

You can check out [NuWorld's](#) signature. The script is also available on the GitHub, you type in whatever you want and it creates a 'Brotherhood' themed signature for you to use.

I've had many other ventures and businesses on HF but not all of them required me to build a website/code, like my drop shipping experiments, or selling stuff. This is all I could find.

Everything I could find is public, all the source code is available, some projects will just be lost forever. Do with it what you wish. Modify it, study the code, learn something, build your business using it, I don't care as long as you put it to some kind of use.

If you need help getting anything running you can post in this thread but I can't promise I'll be around to help.

Any questions or concerns post below.

Please share this thread with your HF friends in your group chats. I'm sure lots of people can put this to good use.

Sad to see you go man! but understandable as life happens. Nice of you to give back to the

community as well! Wish i had invested a lot more in Cryptos back in the day when i was in high school and btc was still really cheap.

First off [Cryptic™](#) you are great dude. Thank you for your contributions man. You can kind of stick around and say hi every now and then. I just had my Wolf Of Wallstreet moment and sold everything I had for a coin called SCN, it was supposed to be pegged to the price of silver per ounce on launch date. No liquidity lol. Sold a \$700 investment for a grand total of .0003 USD. Lesson learned lol. I'll pop back up, I hope. Congrats though brother. You did it right.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first

post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

The market place.

Overall activity on the site.

It's not like how it was back in 2013-2017 when a lot of the OGs were here.

Just look at the first page of the lounge, there are 9+ threads that were last posted in 9 hours ago on the first page.

Activity on HF is no where like it was back in the day.

I used to run multiple businesses here, my VPN business was one of the biggest on HF, and I sold the business when I noticed HF market place going downhill.
