Is this basically an AHK script? If not, i'd love to trial it.

I've dabbled with making my own in AHK and yours "over-aims" a little which is a problem with pixel bots.

I added you anyways.

Nah it is a bit more advanced than AHK. It does however make use of monitor scanning. It is more than just pixel scanning and the application is written in Python

Alright, I've been playing with this and I can say it's pretty fucking good for the price.

The config is very user-friendly and OP has very good comms and legit updated it whilst i was playing for a simple feature I wanted.

I'd recommend everyone to buy this!!

**User** - April 14, 2020, 3:06 pm

Would be cool to see a video in real matches, though good luck with sales.

**cleanman** - April 14, 2020, 6:19 pm

bought and also added you on discord, please add back - thanks

**raumdeuter** - April 15, 2020, 3:22 am

so I just got it, I think it works really well, setting it all up is simpler than I thought

you can either just have fun and rage a bit or tone it down if you prefer a little aim assist, it doesn't

eat up any FPS for me, flawless

**Smexy** - April 15, 2020, 3:28 am

Why would you play/hack anything riot games related?

You aren't good if you get banned and all ur friends can see.

Unless u don't have any morals nor friends, then goodluck fucking random people their "ranks" up just like in CSGO.

Boosting will be targetted aswel, bans for boosters and bans for the boosted.

For some it is just irresistible ;)

**CobraK** - April 18, 2020, 12:56 am

Any new features planned in the future?

**SourceCode101** - April 18, 2020, 1:11 am

Hope all of you get Pernament Ban of hwid  
and never come back :D

**Luca** - April 18, 2020, 2:03 am

Wow, that was fast considering their AC knows when and where you took a shit.

**~eXplode~** - April 18, 2020, 7:05 am

Having the option to rage is not smart at all. This is gonna get detected in a day since devs are gonna be on top of anything cheat related. Good luck with sales though.

**Autophobia** - April 18, 2020, 7:29 am

Do you offer 24 hour slots? id rather pay per day considering you dont know if youre gonna last aimbotting for a whole month and its not like you can just go make a new account.

**Blue Eye Samurai** - April 18, 2020, 7:32 am

"Making this cheat almost impossible to detect and ban."

That aimbot is so obvious, players will get reported and get banned anyway. No matter the smoothing, imo.

Good luck with sales pal

**MadsOvich** - April 18, 2020, 8:23 am

Can I use this product on faceit also???

**Exe** - April 18, 2020, 8:26 am

Wow I hate that you've even created a program like this smh

**xatt** - April 18, 2020, 8:29 am

I watched the gameplay video, even a monkey watching that can tell there is external aim assist. Are you able to change up the smoothness or not make it as blatant? That's an easy ban.

**JasperRed** - April 19, 2020, 2:37 am

I purchased this and its not a sales trash:

Im not even sure how he is able to get results like that in the video, the software it self almost doesnt work, it glitches between aim, barely hits and sniper hits (its like its too slow for player movements). The recoil control i could not even get to work properly and the aim just spins off. Currently, i did better without aimbot with his software.

I messaged him on discord to help me out as clearly i meet all requirements but he does not support.

**SIM-1648682** - April 19, 2020, 4:18 am

If you make such posts please post the whole story next time, being a smart ass about abbreviations doesn't get you far buddy.

So EngineOwning, Dex Aim, System Cheats, and 22cheats. All Claim to be UD but i start up EVERY time i change my hwid and play 15secs then insta banned again, i assume its cause theyre injection method since i get banned before match starts. If youre method is different i wouldnt mind buying but if i still get insta banned without even getting in a match with a new hwid and ip would you be confident enough to issue a refund since it didnt work

I personally dont use those providers though i have friends who do, I use AA.

Though if you're being banned within a few matches, you're HWID banned.

Change your HWID, Change your IP, and wipe your computer / clean reinstall windows.  
( They add identifiers to your PC, so a normal hwid change and a vpn isn't going to help you ).

The providers you listed have not had mass bans, EO and x22 have had no bans automated actually. I can't confirm for the others.

1.6.2 to 1.7.1 BETA

- Reworked mouse movement - Should be more smooth  
config.ini has been rewritten please read it carefully
- AIMKEYNORECOIL is improved. Pistol rounds are a lot better now!

1.7.1 to 1.7.2

- Fixed shoulder aiming while using aimkey

1.7.2 to 1.7.3

- Reverted the aiming system, bit more choppy but a lot more stable

1.7.3 BETA to 1.7.5

- Removed Combined trigger recoil - was causing aim snap

**DizzyPope** - April 26, 2020, 3:36 am

In order to do that follow the next steps:

1. buy a new pc
2. move in to a new house (with brand new internet)
3. buy new acc
4. buy new cheat
5. ???
6. profit u can now play without getting banned by the AC
