Thread: [Start Accepting PayPal Without My Own PayPal?](#)

ISeeU - April 14, 2020, 5:38 pm

Hello community, I've heard that G2A and 2checkout have this feature, selling random product using G2A website without using your own PayPal account to prevent from disputes and yeah, It's risky to sell using your own PayPal as you have high risk level to get limited and they will close your PayPal account after..

So guys? there is some websites like G2A or kind of? to start selling using their own PayPal, then they will pay you after few days?
