NOT hacked clients - ones like Badlion, Lunar, PvPLounge, LabyMod, etc.

What's your favourite? At the moment I use Badlion but just wondering if y'all prefer any others.

Thanks.

Lmao, no. I can't be fucked to not have at least fastmine/fly. Screw walking everywhere, time doesn't grow on trees.

Vanilla with optifine. Don't need much else.

Forge with custom mods, that way I can customize whatever I want.

I have stuff like Optifine, ChromaHud, Keystrokes, Levelhead, Glint Colorizer, WingsMod, and many

more (about 25)

I also have reshade so the game will look smoother
