Thread: [Best tool to exchange Crypto to Crypto](#)

Tangyy - April 16, 2020, 5:07 am

Need a tool that is free and doesn't ask for personal info don't mind paying a small fee to use it. Example exchanging my Bitcoin to monero or my Ethereum to ripple etc you get the point. Thanks to anyone who helps

Hey OP, you might want to check out binance.com it's a crypto exchange mainly built for exchanging crypto to crypto, but it also offers fiat deposits and withdrawals.

The trading/exchange and withdrawal fees are relatively low (Check out the referral link in my signature to save an additional 10% on trading fees).

If you have any questions regarding binance, feel free to ask.

Best regards,
Vox

Use Atomic wallet if you want to remain anonymous. Their wallet offers an exchange service, it's simple and quick. You can even do this on your mobile (besides the desktop version).

hello

Use

instagram.com/paypalcrypto

They don't need any ID or anything, you can inbox them. Hope i helped! Stay safe

I don't know any 'software' to do this

But there are very practical services

I use Cryptopay

If you don't want to use your own identity
you have the choice to create a new one :')

I would recommend Binance. However, there are some fees to consider so take that into account.

No KYC and many altcoins

coinswitch.co

Basically no.

You will have to exchange with a person.

You can buy it here in the marketplace, or you can go to a site like paxful or localbitcoins - beware of scammers at either of those tho.

mkrojtorovic - June 29, 2020, 4:03 pm

Again, i used paxful but rates are bad..so i found by recommendation of my friend instagram service called;

@paypalcrypto

They offer this..contact them and check thanks
