Thread: [Smart screen and window defender crypter](#)

maxlifted - April 16, 2020, 7:19 am

Guy mate, I was wondering if there's any crypter on this forum that can bypass smart screen and window defender in w10. Recommended to me with video proof or any other proved case

Thank you all

The only way to beat smartscreen is to have a certificate, as for defender you can beat defender by interacting with it. A clean program which tells defender what to do will increase your odds in getting the infection.

SmartScreen flags files that are directly downloaded from the browser. specifically executable files. if you zip them -> download -> extract and run SmartScreen won't popup.

I know that simple one line of cmd can bypass smartscreen without problems.

Good downloader should bypass it without worry its not hard to manipulate computer to think that program was created and not downloaded from somewhere.

Exactly, i have been saying a downloader or clean application which interacts with defender lol

SIM-4531245 - April 17, 2020, 12:39 pm

i was using vbs to bypass SS

maxlifted - April 17, 2020, 12:49 pm

Is the vbs fud even when it is downloaded from the internet, it will still bypass ss?

ashwathama - April 18, 2020, 8:31 am

Convert your payload to .vbs script , it won't trigger windows smart screen
