Thread: [Wrong Hackuman Egg Colors](#)

SaintJimmy - April 18, 2020, 9:18 am

I think there's some bug in the system that's causing the green eggs to show up as blues & golds instead. I was wondering as to how Stanley was getting so generous. I cleared cache as well. It seems like a bug. Any idea @Xerotic@ ? Just curious. Scared the shit out of me when I saw multiple blue and gold eggs LMAO.

These guys have green eggs.

It's not just the eggs now, every award seems messed up, displaying the wrong image. Your Corona Virus award shows up as the Monopoly Award. Same goes for your Ninja and Slots Gambler.

Try refreshing your cache, maybe that will help?

Already done that. This was an issue when the Hackuman killer award was added. And this doesn't seem like an issue with me. It's with everyone.

Edit: It seems fixed now.

Refresh those 2 cached pages. I had an issue this morning, which is now fixed but you will need to update the files.

Thank you Omniscient. Just did a hard refresh on both of those pages; cleared the cache just in case. It's all good now. I was of the impression at first that Xerotic has been testing some new HUM feature.
