Thread: [Luminosity Link](#)

Fulya Donmez - April 19, 2020, 8:28 am

I come across someone using Luminosity Link RaT with builder he refused to tell me where he got it.

Please any idea where I can get it?

The builder is embedded in the RAT admin panel. LL is installable on a windows vps.

Sent you a download link by convo.

LL is outdated, author arrested and cracked version most likely broken/infected. You should use something else. Check marketplace for paid rats.

Why on earth would you want to touch LL? ?

The feds arrested the author. Any copies you get are more than likely backdoored as well.

Even if so I wouldn't trust any copies floating around if you can analyze the code to ensure it is not backdoored.

Cant analyze the code as Its executable file which would be cracked.

Also i do not suggest using it.
