The detail in the ebook is great, it reads a lot like a step-by-step (which is tedious for those who are a bit more advanced) but if you read and follow along you will catch little twists and methods that I personally don't think I've seen used together.

There are a few ways (with a bit of programming knowledge) you could even automate some of these methods.

All in all for methods, I would say the majority are known but there is something to be said about tried and true results. He covers things like BlueStacks which everyone has known about, but he shows you other things that you may not have thought about or things that you can do to triple dip your profit.

How much money have you made only from his methods?

Since you vouch I was just wondering for the product :)

Edit:

I don't know why but OP become aggressive from just asking one normal question as a potential customer:

Don't understand why you are commenting on a thread other than using PM? Sales trashing and are you attempting too promote your signature mate?

I ask something as question to someone who got vouch copy, how is this sales trashing? It is a normal question, report my post if you want but I didn't say nothing for your product, one question only, why getting so upset I don't understand.

Repulsive was looking for someone experienced in this field to review this method, and I'm someone who possesses great knowledge in ewhoring, so I read the ebook that was sent to me carefully.

This guide is the worst possible guide you can buy on ewhoring.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
