Thread: [Learing programming/coding](#)

boazk1 - April 20, 2020, 10:39 am

I am new to programming/coding, i want to learn an coding language, but which coding language is it best to start with?

Shadow_Cloud - April 20, 2020, 11:49 am

What would you like to achieve? Programming languages are like tools. If you are looking at a screw, you probably want to use a screwdriver. If it's a nail, you probably need a hammer. It's virtually impossible to answer this question if we don't have the use case.

I did some research myself, i think i am going for C++

vaiperboy - April 20, 2020, 1:44 pm

don't learn to learn

see what kind of project you're trying to make and go from there
like if you want to create a website then C++ serves no purpose to you
