Thread: [Spartan Crypter Help](#)

StringBeam - April 20, 2020, 4:55 pm

I'm using Spartan Crypter with Web Monitor, currently getting 2/27.

The two being Windows Defender & Eset.

Does anyone use the same combination as myself that may know how to hit that sweet spot of 0/27?

I've tried numerous settings and still can't seem to hit it.

Thanks.

What options are you using on Spartan? Any assembly info?

Assembly: Persistence, Delay (5 sec)

Install: Installation, Startup

This got me to avoid windows defender, but i'm still 2/27 with ESET & Sophos.
