Thread: [Best site for up to date movies/ tv shows](#)

Tangyy - April 20, 2020, 6:57 pm

need helping finding a site to use on my ipad and mirror it to the TV all the sites are either low quality or don't have it. Any suggestions ?

Thanks

btw there are a couple results for them

so for fmovies is it - [www5.f-movies.to](#) ?

and moviegag - [moviegaga.to](#) ?

I use Top TV Series and TVShows Club. Both are always up to date and have the shows & moves in quality versions as always. You won't find 4k though. FHD is the limit. And none of them are torrent supporting ones.

Yes, Fz Movies is a good movie site. From FZ movies, you can download movies of different types.

This is a good thread. I've been looking at sites, too, but the people I know don't seem to know where to go. Google gives recommendations, but I'm not sure if they can be trusted. I'll check out these sites.

Nope, it's definitely not dumb to say. Netflix is good, but in my opinion, it's kinda lacking when it comes to movies for me. Their drama series are good, but sometimes we just want to watch a movie.

Popcorn time is really good, you should look into it.

Fair enough, I mostly use it for shows

Stremio is the best for me, I even think they have an app for mobile devices and iPads.
