Thread: [\[#1\] Microsoft RDS CALs | License Your Servers | Cheapest | Fast Delivery | \[24HR\]](#)

NSA - April 20, 2020, 8:58 pm

What are RDS CALs?

If you want to provide access to users to an RDS Collection or RDS Components of a Windows Server operating system, you need to purchase additional licenses. Typically, the RD Session Host (RDSH) server hosts the resources—such as Windows applications or files—and clients connect to the RDSH to access those resources

Host one server for all your users and allow them to use all of microsoft applications.

I license servers for Microsoft Server 2012/2012R2/2016/2019/VDI

Simply send me a direct message with the OS you want licensed so we can get started.

I only charge \$20.00 per license for 25 Users and 50 users for \$35.00.

Delivery of license usually is confirmed within 24 hours.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

works amazing, near instant delivery great deal for the price and got me out of a pickle

Jerk - July 10, 2021, 8:45 pm

So what is the whole use of this?
Please give some examples.
