Thread: [User bar Request <3](#)

Corruption - April 21, 2020, 3:25 am

Hello fellow graphic designers,

I am looking to get some simple userbars done for a forum.

Example of my current Userbar:

I think its a nice look goes with the design of the forum.

Anyways I would like to see by keeping the original templet what can you guys come up with, because I only have the "Owner" userbar.

Here are my usergroups. (btw I like that userbards have a small icon.)

Administrator

Developer

Moderator

Banned

Black Hat

White Hat

Gray Hat

(For Black Hat, White Hat, Gray Hat it't like a fun way of choosing sides basically when a user registered for the first time they are asked to choose a group.)

Thank You <3

Created this in a few minutes. If you like it, then I can do the other ones too.

Yes please those are awesome, thank you.

One thing I would like if possible is to keep the 3D effect. Like the background shadow of the

original userbar.

Glad to hear that you like it :). As soon I'm home I'll do the other.

If I have some extra time I'll add some small things so it could look nicer.

Am i the only one that things that design looks like shit? at least for a forum, would be a good style for a banner/logo but not a UB

edit: not OPs design the other guys.

Well honestly I am happy with anything I can get at the moment. It is free work so am thankful for anything.

And if anyone can offer anything better please try ?

Not me I'm hopeless as FK with gfx but I just think a 3d model as a UB won't fit with a forum design.
