Not on YouTube (don't even have looked if available on to) but if you have Netflix, the story of Luka Rocco Magnotta is now in a serie named Don't f**k with cats.

I only watch them to go to sleep for some background noise.

Dawn of the stone age. This is... I have no words. It's about human being evolution.

Each episode is 2-4 minutes. Total of 8 series.

I love it.

A youtube documentary I really like was Spy on the Scammers by youtuber named Jim Browning, It about a India Scam call center and how he got access to their CCTV and was actually really interesting

There is four parts and its about an hour long
