i tested it and its working but some times give error on startup but restart it few times and its will work

Make sure windefender is disabled then reinstall application

androexo - April 23, 2020, 3:15 am

This is so bullshit lmao xD cant believe how ppl are falling for that!

what you mean ?

pilothacker123 - April 23, 2020, 1:29 pm

Why do I have to deisable Windows Defender? How is it at all relevant when scraping instagram?

you are a malware reverse engineer and trying to tell me this software is a malware ?
or you are tested the software and its didn't worked
non of them right ?
so just shut up and don't comment on things you don't know !
this software get phone number and email address from account busines information so if you dont
seted your phone number on busines information on your instagram account this software cannot
get your phone number or email address.

some noobs without any information trying to say this software is a malware or this software get
your login details
im a malware reverse engineer and a developer
i sniffed this software and monitored my network requests and responses and its dont send your
login details to anywhere and its completly safe

Hey, everybody, we need help.
having come up with such a scheme. On various forums, download emiles basi and through the
program, the checker selects good ones, then it's good ones to almost enter and joke, there are

letters marked "PayPal" "Steam" "Bank" "Credits/Debits cards" "Bitcoin/Cryptocurrency" and so on.
Then email with such letters to collect a base of liquidity in a pile and sell, pig a little start to earn a lot of investments (if there is a letter with PayPal in the mail and there will be \$100 on the account there for what not to withdraw money, why sell such mail? Because I do not know how to do this, and lutche sell email with a balance PayPal \$100 for \$25, than try to remove it myself, and beat the lock.

I am not greedy, and I am ready to work and delitse.)
You are ready for cooperation, write to me. Thank you.

I need programs (software)

1) Checker email (well run and without viruses.)

I already downloaded a lot of checks all beat with viruses.

2) program for automatic entry into email (if any)

3) You advise and opite in this scheme, for me.

thank you all?
