Thread: [multi clients server chat c#](#)

mayar2020 - April 21, 2020, 1:26 pm

hello every one

i am a student in the final year and i must design (chat c# multi clients-server)

my pc is the server chat, and the other pc are clients ..

like that in the video

[youtube.com/watch?v=2xJyHERZ_D0](https://www.youtube.com/watch?v=2xJyHERZ_D0)

i want any source code in c# about that chat ..

please help me .thanks

Shadow_Cloud - April 21, 2020, 10:53 pm

How did you make it to your final year if you are here asking us about this with absolutely no attempt from your side provided? It's extremely hard to edit a blank document. Could you try to do this and we go from there? After all the entire point of being a student is to learn?

Accord - April 21, 2020, 11:07 pm

Do you started any code where we can review or adjusted for you??

i tried 3 months , i cannot do it..please i want any key idea or website tutorial ..

i can do single chat server client ..only

i cannot do multiple clients -server chat c#

Can you post some source?

mayar2020 - April 22, 2020, 12:59 am

please i want like this in that video
youtube.com/watch?v=2xJyHERZ_D0
i want any key point to search in , or tutorial title
thanks in advance
