Thread: [==>> VPN WEBSITE SOURCE FOR SALE \[CUSTOM\] \[AUTOBUY SYSTEM\] \[OPENVPN\] \[AUTOMATED\]](#)

SIM-4543313 - April 21, 2020, 4:19 pm

Hello users of HF,

Today I'am selling my VPN website source. It has never been released or used anywhere. I coded it all by myself, because I wanted to start my own VPN but never really had time to really start-up the project and advertise everything that's the reason I'am selling this now!

Some of the features:

Easy to setup

PayPal auto-buy system

Easy to use admin panel

Easy to use customer panel

Auto server install with the correct software (OpenVPN and some other things that are required)

Check out the demo below to see all features!

DEMO: Soon available again.

Allot of features have been disabled for the demo, but you can use the: Manage Configs tab.

Price for the complete source: €350 (Free setup)

I accept BTC and PayPal, but I will only do contracts on HF

If you want more features added you can always hire me to add them for you after you purchased the source!

If you have any questions just ask them below ?

[contract=tid]PURCHASE THE SOURCE[/contract]

only thing i am missing is btc autobuy
btc auto buy can be configured with any of the good btc payment processor accounts like coinpayments etc.

how much will you charge if I want you to completely set it up for me?

SIM-4665566 - April 21, 2020, 5:13 pm

Is this just the website being sold or an actually working VPN service aswell?

I believe it's just the source.

It's just the source! Fully working as you can see in the demo.

Note: You can only use the tab: Manage configs. The other features have been disabled, so I don't have to constantly reset everything!

SIM-4543313 - April 27, 2020, 6:03 am

This source is still for sale

If you are interested start a contract or send me a message :)

What auth system do you use on openvpn? Pam? Also are users added to server by ssh2? Is there a central auth server or are you adding creds to each server individually

Hello,

Currently user's can't choose password for their configs, but this can be added if you want that and yes users are added using SSH2 on each server individually.

If you have anymore questions just ask them ?

If you're interested you can send me a message :)

Stanley - May 10, 2020, 5:24 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
