Thread: [Notification and Convo not Working](#)

Astrogen - April 21, 2020, 8:04 pm

Just checking if anyone is having the same issue. Notification and Convo on my end is not working, how about yours?

html - April 21, 2020, 8:05 pm

Working fine for me, try refreshing cache?

iNviZ - April 21, 2020, 8:05 pm

Are you on mobile bud?

SaintJimmy - April 21, 2020, 8:09 pm

Seems to be working perfect on my end on both PC and mobile. You should try clearing your cache maybe. It was acting up a few days ago for me. Cleaning the cache fixed for me.

On PC, just checked on mobile and it works fine. Have ctrl+f5 already though but still not working. I'll try clearing hf on my browser.

When was the last time you tried to use it on pc?

Astrogen - April 21, 2020, 8:12 pm

It works fine now, thanks guys!

Have been using HF for a few hours now and it suddenly stopped working. But it's all good now though, have cleared cache and site data and it worked fine again. Thanks!
