Thread: [Valorant server locations](#)

PingersAndMash - April 21, 2020, 10:59 pm

Hi,

Does anyone know what state the servers are in the usa

Simplex - April 21, 2020, 11:07 pm

Nope, pretty sure they are keeping that private during beta.

I mean I'm pretty sure you can check with Wireshark / Fiddler unless they ban debugging tools

PingersAndMash - April 22, 2020, 3:59 am

I was hoping that someone was getting very low ping like 5 and would no it's there local server. I just wanted to no as I'm getting I'm getting 210 ping from oce and wanted to connect my VPN to what ever server it is

Malthemar - April 22, 2020, 4:02 am

Most of the users that complain about latency seem to be on the West Coast, suggesting that the Valorant servers could be located on the East Coast.

Human - April 22, 2020, 4:11 am

I get 25 ping to some servers and Im west coast

PingersAndMash - April 22, 2020, 4:31 am

Hmmmm so is it west coast or east, 25 ping is pretty far away from the host do you get 5 ping to ur local

JW1337 - April 22, 2020, 6:54 am

The devs confirmed in the interview with DrLupo that there would be hosting in central usa rather than just east and west coast servers. However due to covid-19 i think they are unable to go out and setup all the server locations that they want to at the moment.

I'm on e coast and I was getting around 10-15ping when I did play. Game type dry to me and gun play is for handicap cs players.
