Thread: [COD:MW 1v1 HF Tournament | Prizes Available](#)

OMARATION - April 22, 2020, 7:57 am

Hello,

I've had this idea for a while and my recent attraction to Game battles fuelled this further :)

I want to host a HF tournament of 1v1 Gunfight matches with standard match settings. Prizes will be available for the top player.

Tournament Time: 27/04/2020 at 6PM (GMT+1)

The bracket is shown below:

At the moment, I have only 16 players. If I see greater interest I will increase this.

The prize will be: \$15 BTC/PP to the winner. As I'm hosting this, If I do end up in the final, then the other player will receive the \$15 to make it a fair tournament. I'm playing for fun and to improve my skills really.

If you're interested fill out the form below:

I don't think this is very smart to post it in this section, and of this forums.

People are just going to cheat.

Make a requirement that everyone has to stream when they play, to avoid cheating.

EDIT:

I would join, but never played COD so I'll pass

No but thought it might help.

Yeah, hacks are streamproof, and some discord proof.

I would join but I've recently sold my PS4.

However, I'll be watching some of the live streams!

BiggL - April 24, 2020, 12:33 am

yeah I hope this will be streamed, would love to watch it!

Id happily play in this, but I know PC players can cheat easily soo seems kinda pointless imo

Possibly make it console only, thatll fix your problems.
