Hello, I am selling a code that I written and how the script directly will go.

What you'll need is:

-Google Chrome

Simple & Easy, this also saves previous chats on the side for you.

This is no extensions, no downloads, straight code.

The bot will:

Spam, undo the chats after "x" amounts of seconds that you set it as.
easy set up.

Great for eWhoring or getting CPA clicks!

I'm interested in the script but I have 1 question:

- Let's say I have few tabs open on my browser, when I run the script on the tab where Omegle is opened can I still use the other tabs normally without having the focus on the Omegle tab? Thanks.
