I mean how much risk are you willing to take? If you're willing to risk a lot I'd say crypto if not much risk I'd say blue chips stocks

If you have 25k spare to invest and you don't know what to invest, don't.

Save it for a house, car etc.

You don't invest this much if your clueless about how to invest it.

I agree if you don't know much about the Above mentioned methods your better off putting in a high yield savings account or bonds.

Start an affiliate website blog in any niche, buy articles - hire writers, buy seo backlinks etc etc.Promote products/services. You will be able to make money from it after 1 year or so when it starts to rank. You can do that easily with 10k or so if you go serious about it.

Other ways go full eCommerce man, get a course there are plenty of them learn some ecommerce

and outsource most of the work hiring other people.

With 25k consider finding a wealth management firm to invest it for you A LOCAL ONE!

Buy an ebook here on the forum, learn a skill and then start a bussiness, and invest.

Dont invest all your money, if you are here asking, is because you dont know how to do.
Follow my advice, learn to do something, and start small, you have the money to scale fast if you feel like you find something.

My advice would be to go to Flippa.com there are thousand of websites with huge traffic ,but more exactly there are people who sell their business . For example with 25000 you can buy a website who can make you 500\$ per month or more for years to come .But beetr go to flippa and search for websites and there you will get all the details how much the websites makes per month etc .Study very well there

Be wary of people selling ebooks/get rich quick schemes.
Remember if it seems too good to be true it probably is.

Not ALL of them are scammers but there is a lot of nonsense in the ebook world.
