Thread: [OSCelestial...](#)

StringBeam - April 22, 2020, 5:42 pm

First off I'd like to say OSC was and might be the best Java rat that was ever put out. Don't flame me if you feel otherwise.

The stability was great, 99.9% of the time it was FUD. The plugins were reliable and there were plenty to choose from.

I had dabbled a bit in Imminent Monitor, and the other one ran by KFC Watermelon. But soon found out that for my targeted audience it wasn't going to pan out with an .exe.

So when I swapped over to OSC, I soon realized that I had the perfect tool in my hands for what I was looking to do. It took a bit of time perfecting my spreading, but soon I'd have mastered it, and next thing I knew I had over 2200 clients.

I reached out to the developer, and we became somewhat friends. I discussed taking over the operation as he wanted out of the game as a whole, we talked it over a couple of times until.. well he went on an extended vacation. Haven't heard from him since. (F in the chat)

Enough of the sob story.

I'd like to know, with the lack of solid java rats on the market at the moment, if it would be possible to recreate what he was working with, or maybe pick up where he left off.

Not sure if this is a matter of decompiling every file, and trying to rebuild it. Not a fucking clue.

Anyway, let me know if I'm a dumbass or if this is actually possible.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
