Thread: [Why covid-19 affects men more than women](#)

It seems that the virus can harbour in the testicles, making men more vulnerable.

Inb4 the majority will have infertility and China eventually takes over the world.

Yes and that's maybe why. Surely it's not the only virus who can build a house in our balls.

Exposed74 - April 23, 2020, 3:17 pm

Now everything is clear. It's a virus hand-made by the FEMEN !

Lmao blame the patriarchy. All the feminists have gone into hiding?

I heard andrew shulz talk about how the vaccine is going to be made by the gender that made all the other vaccines; men.

Then again, back in the day, girls couldn't really go to school so I wouldn't say its a fair comparison.
