LATEST UPDATE

NEW UPDATE RELEASED!!

v4.7.2

1. Inbuilt & Private SMTP Updated
2. Multiple instances of same Email address in logs fixed
3. Sv4 Improved for Custom SMTP
4. Total Emails loaded and Total Emails Sent stats added in logs
5. Logs configured for Inbuilt SMTP
6. New feature added "Maximum Performance" for Sv2.7 resulting in increase Sv2's delivery speed
7. Recommendation for removing invalid entries added while adding Email/Contact list

v4.5.0

1. Select sender Algorithm

Now you can send your mails by using either of the 2 Sending Algorithms. Sv2.7 & Sv4

Sv2.7

Sv2.7 - is an older and more reliable algorithm that CyberBomber used until update 4.1.0.0. However to reduce the sending time for huge campaigns, the algorithm was replaced by Sv4.0.

Sv4

Added with the release of CyberBomber v4.5.0.0, Sv4.0 is a faster, more efficient algorithm to send out mails for campaigns. The algorithm also displays live logs while the campaign is running.

2. Use IP Address as Host

Fred Thompson Wrote:I used cyberbomber and it was the bomb!!! I remember disturbing the seller on skype several times if i could subscribe again.

How i wish i could go for this again?

Welcome back bro...

Any discount for old customers? I have proofs i have bought this before...

Lol...

AlibabaMarket Wrote:nice product. Good luck with sales bro

jacksparrow99 Wrote:Op verifier works by sending text message, verified my mail and it it sent message to my inbox as test and it showed valid, nice.

driltip Wrote:I have used your product for 6 months and the deliverable rates was good because of the multi smtp random pipeline sending, but gt please consider adding tags

JackerChan Wrote:Purchased CyberBomber a couple days ago, vouch for Gtrails, this mailer is AWESOME!!!! The tool works as said, user friendly, also multiple smtp is really great. OP also gave me support over anydesk. Great work mate, I am really happy with the inbox rates of Cyberbomber.

10/10

adam2531 Wrote:Really appreciate your support and a very good software i must say. Please check skype when you come online :)

jacksparrow99 Wrote:Nice new update, the inbuilt sends. Thanks.

MonsterPrograms Wrote:Seems like a really good mailer with lots of good unique features (especially the email list generator + verifier), good luck with sales.

E-land Factory Wrote:Highly recommend! Really amazing software. everything is working and loads of options, Good price Also.

I added your discord.

I see you use Gmail as your test of proof there... how about inbox/spam box for hotmails/yahoos etc

Also its great that can spoof the Name of sender but how about the email? reply-to is different to a spoofed email

Hey bud, all queries resolved over discord. Same Inbox rates for Office, Hotmail, Yahoo etc.

Also spoofing an email address isn't really a good option, most spam filters detect this and block the Mail right away, hence its not included in CB either ?
