Thread: [best mail address or FTP to receive key logger](#)

mayar2020 - April 24, 2020, 3:46 am

hello every one

i use key logger reporting mail , but i have a problem that google block the email after a few days as it detects many login from many pc ..

which is the best mail websites or ftp to receive key logger report?

thanks

Set your email delivery interval to 12 hours. So as to reduce the number of logs sent by your gmail SMTP. Gmail sets max of 500 emails per day limit on your gmail SMTP. When ur gmail account trys sending more than 500 emails per day through SMTP settings, your account gets blocks.

thanks very much sir;

i want to ask the best FTP or mail to receive without limits of mails received??

Buy or get a Cpanel and create an FTP account there. FTP account will take more logs than free e-mail accounts. If you prefer to use e-mail, then you will have to get an SMTP account to configure in your keylogger builder to send to your preferred e-mail address. You can also try webmail as they have higher email sending limit per day.

could you suggest free ftp ?

thanks in advance sir
