Thread: [IMPORTANT JAILBREAK UPDATE](#)

xAlimorAx - April 24, 2020, 7:53 pm

Ok guys so on April 20th there was what i consider to be one of the biggest breakthroughs in a long time for jailbreakers, especially those of us that are on iPhone XS or Newer7 devices and those of us who accidentally updated to 13.3.1 or newer on any device with a A12 processor.

April 20th 2020 iPhone Developer Proteas (@ProteasWang) posted proof of a tfp0 bug which he claims would allow a full unteathered jailbreak on A12/A13 devices running 13.3.1-13.4.1... That means all of you stuck on iPhone XS and 11 who accidentally updated or bought a phone with one of these IOS's already installed.

I originally read this on Twitter from Jailbreak News poster Silzee. You can find the full article and more info on his site <https://silzee.com/ios-13/>

Also

Chimera13 will be coming soon for iOS 13 and above. Keep hopes guys

SilzeeJB - May 18, 2020, 2:32 am

Chimera13 jailbreak coming soon for iOS 13 to iOS 13.4.4 versions. Chimera13 is the extended version of the Chimera12 Jailbreak tool. Also, CoolStar released Chimera13 as an open-source to the memory of @s0uthwes. ??
