Basically it is a floodcrm invite generator. You simply put the invites in, and users generate them. If you are familiar with floodcrm, when someone signs up with your code you earn 10% of every deposit they make into the service for life. I have negotiated with the admins and I get 20% now. Anyways, the site is for sale. It is ranked #1 on google for "floodcrm invite generator" and "floodcrm generator". It ranks mid-page for "floodcrm", which is where it gets most of its traffic. The site has gained 300 users in less than two months and it wasn't promoted at all, google does all the work since it's ranked well.

Everyday on google now the traffic stats are 1k-1.2k views per day with a 8% ctr rate or so. Domain and hosting are paid for until feb 21st 2021.

Weekly income average is \$80-110.

Some payouts + referrals the site has earned

aproximately?

Got a \$500 offer, would instantly sell for something around the \$800 mark. I do have discord but would prefer to reach an agreement on site (discord can be used to make the transferring process easier)

Ownership has been sold offsite.
